

PROVEN CONNECTIONS

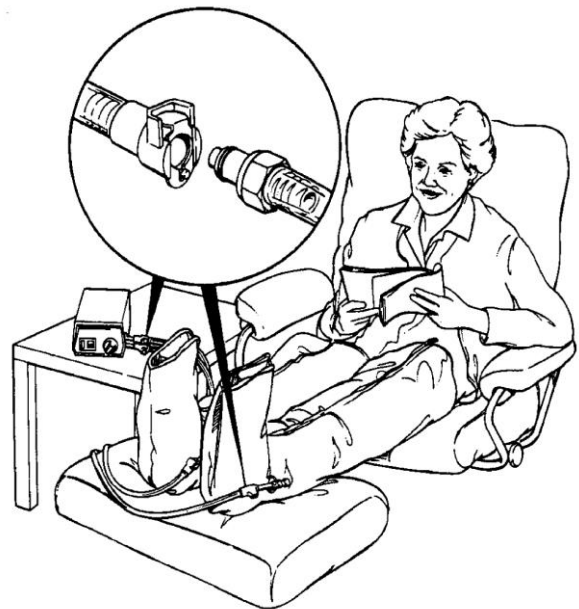

Deep Vein Thrombosis Apparatus

Standard Industrial Classification System/NAICS:

3842: Surgical appliances and supplies

Application:

Deep Vein Thrombosis (DVT) systems, used to stimulate blood flow to prevent blood clots, require connectors that have shutoff valves, small size, are light weight, and have high flow.

Features/Benefits:

- Time saving design
- No need to shut off air supply
- Reduces time patient is without pressure to their veins
- Easy to carry and conceal
- Uses safe acetal material
- Cuff deflates quickly
- Allows cuff to be easily removed by patient
- Cost objectives met
- Adds value to product
- Easy to use for elderly people

Media:

Air

Pressure:

5 psi
0.35 Bar

Temperature:

Ambient

Colder Part Numbers:

PLCD170-04
PLC170-04
PLC220-04
